

TYPES OF QUESTIONS

TYPE-1

Directions (1-5): Read the following passage carefully and answer the questions given below.

The government has made two crucial clarifications on the e-auction process for captive coal blocks in order to make them more attractive to potential bidders. According to the changes introduced by the coal ministry, existing or upcoming power plants that don't have power purchase agreements (PPAs) with buyers of electricity will also be eligible to bid for the coal blocks. Also, the reserve price of Rs. 100/ ton payable by the successful bidder will be included in the energy charge, which means that fuel cost that will be passed through to consumers will include reserve price along with the actual rate of coal at which the bid has been won. This could translate into bidders willing to bid more aggressively and still manage to run a profitable business. The minutes of meeting released by the ministry said "power projects which do not have PPAs today but would be entering into PPAs (Case I bidding) in future also need to be covered explicitly." Generators without PPAs have been in dilemma for some time, This was because states are unlikely to enter into PPAs with generators that do not have coal linkage and Coal India would refuse to give linkage to generators without PPAs. It has been tried to correct the situation by allowing such generators to enter into the auction fray. Apart from the scarcity of coal that has led to more than 15,000 MW of generation capacity not being able to sign coal linkage pact with Coal India, the situation has been exacerbated by the loss-making state-owned distribution companies not shying away from signing pacts with power producers for long-term supply of power because of financial health. While there will not be any deadline in place for such capacity to enter into PPA's they will not be allowed to sell more than 15% of its capacity in the open market. These bidders will also have to pay an additional reserve price for the of coal used for power sold in the merchant market, over above the reserve price for other generators with long-term PPAs which is Rs. 100/ton. The clarification significantly invigorates the auction as there's considerable generation capacity without fully covered fuel supply, and generators can create an additional profit margin between the escalation offered in Case I bidding documents and the actual cost inflation. As regards the reserve price (which is to be paid to the state government) being a pass through. For merchant power, the reserve price is higher; the new proposal will make sure that there are no extraordinary gains from open market sales. This is a safety feature as bidders would factor in the extra reserve price in their prices."

निर्देश (प्रश्न संख्या 1 से 5 तक): नीचे दी गई तालिका में जानकारी का अध्ययन करें तथा प्रश्नों के उत्तर दीजिए।

नीचे दी गई तालिका में वर्ष 2014 से 2019 तक के दौरान चार विभिन्न जोनों (K, L, M और N) से किसी प्रतियोगी परीक्षा में शामिल हुए (A) और उत्तीर्ण हुए (P) विद्यार्थियों का आँकड़ा दिया गया है।

विभिन्न जोनों में विद्यार्थियों की वर्ष-वार संख्या								
वर्ष	तीन							
	K		L		M		N	
	A	P	A	P	A	P	A	P
2014	782	360	612	310	720	410	1020	802
2015	804	472	608	324	728	480	1135	840
2016	720	448	636	298	680	390	1084	864
2017	730	360	655	305	695	396	1096	766
2018	824	504	640	346	712	424	1180	732
2019	850	496	600	315	740	464	1165	780

1. सभी छह वर्षों में मिलाकर जोन-K से परीक्षा में शामिल हुए विद्यार्थियों की कुल संख्या और उत्तीर्ण हुए विद्यार्थियों की कुल संख्या में कितना अंतर है?
- A. 2060 B. 2070
C. 2080 D. 2090

TYPE-7

10. नीचे दो कथन दिए गए हैं:
